Summary

Self-taught Data Scientist and Analyst with +1 year experience and a passion for leveraging data to drive business decisions. Proven track record of success in developing and implementing data-driven solutions to complex problems. Experienced in working with large datasets and creating data visualizations.

Experience

Raameyyah, Data Science Intern

Dec'22 - Current

- Conduct exploratory data analysis on large datasets using Python and its libraries
- Develop predictive models using machine learning algorithms to support business decision making
- Build and deploy machine learning pipelines for data processing and model training
- Collaborate with team members to identify and prioritize areas for data-driven improvement
- Communicate findings and insights to non-technical stakeholders through presentations and reports

McKinsey & Company, McKinsey Forward Intern

Jan'23 - Current

- The McKinsey Forward program is a 3-month virtual program designed to develop business acumen, strategic thinking, and problem-solving skills. During the program, I learned about industry trends, management consulting methodologies, and effective communication strategies.

Raameyyah, Data Analyst Intern

Nov'21 - Nov'22

- Conduct data analysis using SQL, Excel, and Tableau to support business decision making
- Develop and maintain databases to ensure data accuracy and consistency
- Create visualizations to help stakeholders easily interpret data and identify trends
- Collaborate with stakeholders to develop actionable insights from data analysis
- Present findings and insights to management using clear and concise visualizations
- Collaborate with my teams to gather requirements and develop reports to support decision-making
- Assist in the implementation of data quality checks and ensure accuracy and consistency of data

BadorStock, E-commerce Store Co-Founder

Aug'20 - Feb'21

- Assisted with Utilizing drop shipping model to manage and fulfill product orders from suppliers
- Manage website design and content, social media ads
- Assisted with managing and updating product listings on the company's e-commerce website
- Assisted with Conducting keyword research and implementing search engine optimization strategies to improve product visibility
- Utilized Google Analytics and other tools to track website performance and user behavior, and provided recommendations for improving the user experience
- Assisted with developing and executing social media and email marketing campaigns to promote products and increase customer engagement

Certificates

Elements of AI: Introduction to AI, University of Helsinki

Aug '22 - Oct '22

The Certificate helped me gain a basic understanding of the history, terminology, and current applications of AI. I also learned about the ethical considerations involved in developing and using AI.
